## LEADERS

### Leader Casualty Fate

After the battle has been resolved, for each Leader casualty, roll on the appropriate table below to determine the Leader's fate.

#### Casualty in Melee Combat vs Infantry or Mounted

- 1 Slain
- 2 Mortal Wound
- 3-6 Roll Again...
  - 1-2 Captured
  - 3 Crippled
  - 4 Serious Wound
  - 5 Moderate Wound
  - 6 Light Wound

#### Casualty in Other Circumstances

- 1 Slain
- 2 Mortal Wound
- 3-6 Roll Again...
  - 1 Crippled
  - 2 Serious Wound
  - 3-4 Moderate Wound
  - 5-6 Light Wound

### Explanations of results

**Captured** – Captured by the enemy.

**Crippled** - Seriously wounded and carried from the field on a blanket. He later recovers but is crippled permanently and retires to live the rest of his life in peace on his villa.

**Light Wound** – Lightly wounded and helped from the battlefield by his staff. He recovers to fight again and returns to duty after a few days.

**Moderate Wound** – Moderately wounded and injured when his horse was shot and fell on him. He was helped from the battlefield by his staff. He recovers to fight again and returns to duty after a few weeks. He misses the next battle in the campaign.

**Mortal Wound** – Seriously wounded and carried from the field on a blanket. He later died under the surgeon's knife.

**Serious Wound** – Seriously wounded and carried from the field on a blanket by his staff and soldiers from a nearby unit. After a few days he recovers enough to command from a litter but will not be fully recovered until he can take a long rest at the end of the campaign.

**Slain** – Killed in action. Decapitated by a sword stroke, takes an arrow in the eye or a pilum that couldn't be stopped by a shield.

## **Leader Replacement**

Leaders that are Captured, Crippled, Mortally Wounded or Slain are immediately replaced by a New Leader. A subordinate is promoted.

Leaders that are Moderately Wounded are immediately replaced by a Temporary Leader. A subordinate fills the gap while the Leader recovers.

## **Leadership Quality**

A Leader commanding from a litter instead of horseback, has his movement reduced to 1, as does any unit to which he is attached. His movement may not be increased by playing a card.

A replacement Leader must be designated as Infantry or Mounted and may only be attached to that type of unit.

Litter-bound, New and Temporary Leaders have their command range reduced to 2 instead of 3. When ordering units in contiguous hexes, they are limited to 2 instead of 3.

## **CAPTURING A THOPHY**

When a unit is eliminated in melee (including battle back) its opponent should attempt to capture a trophy. This could be an Eagle, Standard or some other trophy. Not all units have such trophies; this must be decided in the campaign. Unless otherwise specified, all red and blue units have trophies except elephants and war machines.

Infantry may capture a trophy from other infantry and mounted that of either infantry or mounted. To be eligible, an ordered unit must take ground.

Roll 2 dice:

Flag+Flag      The trophy has been captured.

Flag+Sword    An infantry trophy has been captured by a mounted unit.

## GLORY

Glory Counters are awarded at the end of each battle. The losing side gets one Glory Counter if it gets at least half the required number of Victory Banners. The winning side gains Glory Counters equal to one plus half the difference in Victory Banners (rounded down). One additional Glory Counter is awarded for each leader or trophy captured.

Glory Counters can be used in subsequent battles in the campaign in a number of different ways.

### Heroic Unit

Immediately after a battle has been completed, the winning side may use one Glory Counter gained during the battle to class a surviving infantry or mounted (other than elephant) unit as "Heroic". The unit must have performed exceptionally well during the battle. That unit may then appear in following battles. It will remain heroic until the end of the battle in which it first loses a block.

A heroic unit will score one hit for each leader symbol rolled in close combat. A leader does not have to be attached or in an adjacent hex to confer this benefit. A heroic unit may ignore one flag.

### Rally

In order to Rally, a Glory Counter can be played at the start of your turn immediately prior to playing a Command Card. This returns a single block of any type to any single under-strength unit anywhere on the battlefield. A unit may not gain more blocks than it originally had. Rallied units are not automatically ordered.

Elephant units may not be rallied.

### Leadership

In order to gain a Leadership bonus, a Glory Counter can be played at the start of your turn immediately prior to playing a Command Card. This will allow one ordered unit to roll 1 additional die if it battles.

### Stragglers

At the start of a battle, up to half of your available glory points may be used to make the opposing army straggle. For each glory point spent, roll one die.

Die Roll	Effect
Red	Your opponent must remove one block from any red unit of his choice.
Blue	Your opponent must remove one block from any blue unit of his choice.
Green	Your opponent must remove one block from any green unit of his choice.
Leader	No effect
Flag	Your opponent must retreat one unit of his choice back one hex.
Sabres	You remove one block from a full strength unit of your choice.
